November 10, 2021

Dear Resident/Family Members/Designated Representatives:

Hopkins Rehabilitation and Health Care Center is always striving to keep you informed and updated on COVID-19 safety and precautions during this National Health Emergency.

The recent emergence of the Omicron Variant has prompted Hopkins Center and its staff to implement additional strategies to ensure the ongoing protection of our Residents, Staff and Visitors and remain compliant with Infection Control practices. We are engaged with renowned professionals in the Infectious Disease Specialties and maintain regular communication as we consider different strategies impacting the facility.

Room changes, as an effective strategy to ensure the ongoing protection of our residents and to minimize the risk of exposure to the virus has become critically important. We now have designated a specific unit for the care and treatment of COVID infected individuals. We are engaged in regular testing throughout the facility to be able to quickly intervene and provide accommodations while reducing the need to hospitalize your loved one. Our staff will make calls to inform you as it is feasible of impending room changes but our need to act quickly may delay the notification. Therefore, we are asking for your patience and understanding.

Updates are made daily on our website www.hopkinscenter.com for your convenience. Should you have any questions do not hesitate to contact any member of our staff who will be able to assist you with connecting to a specific individual to respond to your questions and concerns.

Sincerely,
Administration
